MAPPING Second General Assembly

mappingtheinternet.eu

Privacy

Intellectual Property Rights

Internet Governance

Dialogue & Participation

The MAPPING project consortium is looking forward to the next meeting of invited stakeholders, interested in debating the existing innovation policies, business models and legal framework related to three major, interrelated focus areas: Internet governance, Privacy, Intellectual property rights.

After the success of the First General Assembly in Hanover in September 2015, in the Prague 2016 General Assembly we expect the continuation of the dialogue with key experts and policy and decision makers, who are involved in research and innovation in the above mentioned areas within Europe's political, social and economic context.

Following recommendations from the participants of previous General Assemblies, the event in Prague will take place over three full days.

In order to support the participation process, you are welcome to express your interest to participate during this event at mappingtheinternet.eu/SGA.
